**From:** Royster, Deborah (DCOA)  
**Sent:** Wednesday, May 14, 2014 11:36 AM  
**To:** 'Marjorie Hirst'  
**Cc:** Fleps, Christina (OCTO)  
**Subject:** RE: FOIA Request

Dear Ms. Hirst:

I am writing to advise you that the District of Columbia Office on Aging does not have information in its records that is responsive to your request below. You may want to follow up directly with the District of Columbia Office of the Chief Technology Officer (OCTO) to determine whether that agency has information that is responsive to your request. For your information, I have copied Ms. Christina Fleps, OCTO's General Counsel and Freedom of Information Act Officer, on this message to enable you to correspond directly with her concerning this matter.

Please let me know if you have any questions or if I can be of additional assistance. Regards. Deborah

**Subject:** FOIA Request

Email: [deborah.royster@dc.gov](mailto:deborah.royster@dc.gov)

Dear Officer:

Under the Freedom of Information Act, 5 U.S. C. subsection 552, I am requesting access to information concerning Youtube viewing from government computers on history and emails related to youtube videos that exist in your department. I am requesting a waiver of fees as I am a member of the media and am publishing online information about the viewing history of certain Youtube videos by government employees. The videos I am requesting FOIA searches on are the following specific Youtube videos.

<http://www.digatree.com/TradesWanted18902.html>  
<http://www.digatree.com/TradesWanted18903.html> Each year ten of thousands of meteorites hit the  
earth. They are worth big dollars to the finders. In fact they are worth more than gold. You might say  
they are black gold. This is your chance to find one. You also will be able to say that you have  
entered the Twilight Zone. Did you ever go on a strange vacation? Well this one is out of this world.  
When you come to Truth or Consequences to see the new space station that will launch tourists into

space, do a little walking to find space junk...meteorites on our ranch. Hunting for meteorites does not have to be a bone chilling adventure to the Antarctic where the temperature is 50 below zero F and 50 mile per hour winds. Meteors enter the earth atmosphere everywhere. They impact everywhere. The trick in finding them is to look where they have had a good chance of impacting or where they have been concentrated by natural forces of the earth and have not been destroyed by weathering. This means deserts are a good place to search for meteorites. Deserts can change over the centuries. But deserts don't always have major weathering. Thus if you want to find meteorites you may want to come to our Truth or Consequences Ranch. It is located in New Mexico adjacent to the Chihuahuan Desert. There are trillions and trillions of terrestrial rocks for each meteorite that could be in this area. Metal detectors are used by many professional meteorite hunters around the world. Metal detectors can easily distinguish between ferrous and non ferrous rocks. Since not all meteorites are ferrous only the ferrous meteorites will be found by the metal detector. Modern metal detectors can balance out dominant background rocks. This enhances the detector to find the meteorites. Metal detectors create a constant hum. The volume and pitch of this hum increases as the detector passes over the metallic object. There are hot rocks which produces a signal but is a false positive. Thus detecting requires concentration and you will see lots and lots of hot rocks. You must also keep a visual eye for other interesting rocks which can be meteorites. It seems that the best way to find meteorites from this area is to use a combination of metal detecting and good old-fashioned shoe-leather
